Project	Location	Substrat	Technical Data	UTECH Services	Customer	Year
Biogas Plant Honduras	Honduras	water hyacinths	laboratory tests to digest water hyacinths, draft planning of a biogas plant, organic waste sludge and fat	laboratory tests, evaluation, report, recommendations	Grubo Terra	2008
Biogas Plant Dom.-Rep.	Dominican Republic	bagasse org. sludge	laboratory tests with cachaza and bagasse; draft planning of a biogas plant	laboratory tests, evaluation, report, recommendations	CAEI	2008
Biogas Plant Schlempe	Bremen	wheat vinasse	biogas production from vinasse of bioethanol plants, thick and thin vinasse fraction, CSR and fixed bed digester	laboratory tests, evaluation, report, recommendations	e.on	2008
Owners Training	Niedersachsen	--	teaching and seminars for biogas plant owners and employees in Niedersachsen	lecturer	LEB Niedersachsen	2004 -2008
Training of Foreign Skilled Workers	Bremen	diverse	Teaching of former biogas plant owners and employees in the important aspects of biogas technology, theoretical and practical works, technique and biochemical basics, full scale plants, laboratory analytics	creation of training materials, implementation and organization of training	Diverse	2004 -2008
Zero-Emission Oil Mills	Southeast Asia	waste and wastewater from palm oil mills	zero-emission concept for palm oil mills of southeast asia through recycling and the use of anaerobic technology in combination with composting. Realization of all components in technical scale, chances for CDM trading	concept, economical calculation, report, publications, work in cooperation with FAL Braunschweig	BMBF	2004 -2006
Biogas Potential Study	Dominican Republic	oil mills slaughter houses feedstocks	project evaluations with calculation of biogas potentials in oil mills, slaughter houses, agricultural farms, combination with composting, CDM-qualifications of projects	data research, concepts, economical evaluations, recommendations	MercaSid	2007

Project	Location	Substrat	Technical Data	UTECH Services	Customer	Year
Biogas Plant Torun	Poland	organic waste materials	feasibility study for a biogasplant with organic waste materials, electrical capacity from 500 to 2.500 kW	feasibility study with data research, concept, economical evaluations, recommendations	City of Torun	2007
Biogas Plant and Gas Feed into Pipeline	Rotenburg/W. Niedersachsen	organic waste materials	biogas plant on the basis of energy crops > 3,0 MWel with biogas treatment to feed it into the natural gas pipeline, gas utilization in decentral cogeneration plants	feasibility study with data research, concept, economical evaluations, recommendations	Stadtwerke Rotenburg	2006
Biogas Potential Study	Chile	diverse	biogas potentials in agriculture, industry and municipalities, adaption of german technique to chilenean requirements	feasibility study with data research, concept, economical evaluations, recommendations	UTECH	2006
Biogas Plant Mardorf	LK Marburg Hessen	cow manure maize silage	concept for a district heating system in combination with a biogas plant	dimensioning, cost estimation, evaluation of alternative solutions, economical evaluation, recommendation	private	2006
Biogas Plant Hohenkirchen	Niedersachsen	cow manure maize silage	feasibility study with technical and economical aspects for a biogas plant	data research, dimensioning, site evaluation, permission requirements, cost estimation, subsidies, ecemical evaluation	Farmers	2006
Biogas Plant Haendorf	Niedersachsen	maize silage	feasibility study with technical and economical aspects for a biogas plant	data research, dimensioning, site evaluation, permission requirements, cost estimation, subsidies, ecemical evaluation	Farmers	2006
Fixed Bed Digester	Niedersachsen	vinasse	implementation of a fixed bed digester to reduce industrial organic wastewater	laboratory tests as batch and continuous tests, report, concept for a technical scale biogas plant	BASF	2005
Biogas Plant Ardorf	Niedersachsen	maize silage	feasibility study with technical and economical aspects for a biogasplant	data research, dimensioning, site evaluation, permission requirements, cost estimation, subsidies, ecemical evaluation	Farmers	2005

<i>Biogas as Fuel</i>	Niedersachsen	diverse	evaluation of treating biogas to fuel and operating of CNG filling stations as well as feeding it into the natural gas pipeline. Several project, sponsored by BMU	data researches in Germany and Europe, collection and evaluation of technical systems, economical evaluations, applications for subsidies	Wüsthof Biogas GmbH	1998 -2002
<i>Biogas Plant CSH Jakarta</i>	Indonesia	slaughterhouse waste and wastewater	accompanying the installation and commissioning of a pilot biogas plant of the slaughterhouse Jakarta (CSH), concept within a R&D-project of BMBF	accompanying the installation and commissioning, waste and wastewater concept	TÜV Rheinland	1989 -1997
<i>Biogas Laboratory University of Tunis</i>	Tunesia	diverse	installing a biogas laboratory in Ecole Nationale d'Ingenieurs de Tunis (ENIT).	installation, teaching	gtz GmbH Eschborn	1985 -1987
<i>Help with Operation of Biogas Plants</i>	east Germany	diverse	R&D project "process control and operation of agricultural biogas plants with dynamic operation". Financed by FNR from a BMVEL-fund	R&D-works, calculations, report, presentations and publications	UTECH / FNR	2001 -2002
<i>Biogas Plants Neue Bundesländer</i>	east Germany	diverse	R&D-project from BMFT "stocktaking and future applications of biogas technology in east Germany"	data research, analysis, interviews with operators, potential survey, economical evaluation, report	BMBF	1992
<i>Biogas Plant Slaughterhouse</i>	Niedersachsen	organic waste materials	feasibility study to the anaerobic digestion of slaughterhouse waste materials within a plant to treat dead animal bodies	feasibility study with data research, concept, economical evaluations, recommendations	Westfleisch	1991
<i>Biogas Potential Study</i>	Niger	slaughterhouse waste wastewater manure, crap	feasibility study to the anaerobic digestion of slaughterhouse waste materials and farms in Niger	feasibility study with data research, concept, cost estimations, economical evaluations, recommendations in cooperation with BORDA/Bremen	gtz GmbH Eschborn	1986
<i>Biogas as Tractor Fuel</i>	Ivory Coast global	diverse	feasibility about the implementation of biogas-driven tractors in developing countries	data research, technical and economical evaluation	gtz GmbH Eschborn	1985

Transportable Biogas Storage Bags	India	--	field test with flexible biogas storage bags in Wardha, India	data research, construction of test bags, report and recommendations	gtz GmbH Eschborn	1985
Biogas Plant Nuakschott	Mauretania Bremen	waste fish material	R&D-works about the anaerobic digestion of waste fish material taking different salt concentrations into account; laboratory tests with one- and two-step digestion	Laborversuche mit Analytik, Auswertung, Bericht	gtz GmbH Eschborn	1985
Biogas Plant Coetivy Island and Mahe	Seychellen	diverse	Prüfung der Einsatzmöglichkeiten einer Biogasanlage auf Coetivy Island und. Möglichkeiten der Biogaserzeugung aus industriellen Abwässern auf der Insel Mahe	data research, concept for the utilization of energy and sludge, report, recommendations	gtz GmbH Eschborn	1985
Flow Tests	Bremen	cow manure	flow tests in a lying digester without agitator, R&D-project financed by BML	scientific research, measurements with tracer materials	BML Bonn	1985
Biogas Manual	global	diverse	biogas manual for decision makers in developing countries	translation and writing chapters new, layout and translation in cooperation with BORDA/Bremen	gtz GmbH Eschborn	1984
Plastic Materials and Biogas	global	diverse	feasibility study about the application of plastic materials in biogas plants; R&D-project comparing new with aged materials	data research, decision and procurement of suitable material, laboratory tests in cooperation with ETH Zürich, report and recommendations	gtz GmbH Eschborn	1984
Biogas Plant Ingelstad	Sweden	cow manure pig manure	feasibility study with technical and economical aspects for a biogas plant	data research, dimensioning, site evaluation, permission requirements, cost estimation, subsidies, economical evaluation	farmer	1983
Biogas Plant Ågard	Sweden	pig manure	feasibility study with technical and economical aspects for a biogas plant; 500 SVU	data research, dimensioning, site evaluation, permission requirements, cost estimation, subsidies, economical evaluation	private	1983
